

A park of protected wetlands, surrounded by the sea, with an east beach and a west beach

Kasai Marine Park is made up of two artificial tidal flats and a marine area that includes natural shallows and tideland. It stretches 2 km offshore, and boasts an area of around 412 ha. The park was created by reclaiming land from the sea to preserve the disappearing tidal flats in Tokyo Bay, and opened in 1989. Visitors can enjoy a variety of recreational activities on the West beach, such as clam digging.
