

Activities

Kasai Marine Park runs lots of different activities with the help of local NPOs and other groups, including passing down the culture of areas where people live with the sea (*sato-umi*) and teaching people about the environment. Come and join us!

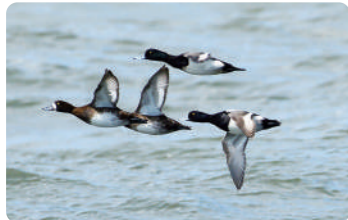

Clam Digging April to June

At low tide, the tidal flats form a great expanse where visitors can dig for clams. You might find clams and crabs.

Sea Swimming Mid July to late August

You can swim in the sea on West Beach in the summer.
*Swimming is not permitted outside of this period.

Wildlife Watching All year round

You can enjoy catching shellfish and crabs on the tidal flats, as well as birdwatching. We also hold wildlife watching event at various times.
*Please release any creatures you caught" after the observation.

Beach Clean All year round

Beach clean-up events are held regularly. We lend participants equipment to pick up trash.

Other

New Year's Sunrise

From 6:00 a.m. on Jan 1

Specially open from 6:00 a.m.
*Takes place depending on conditions

Stunt-kite Experience

All year round

Held at various times on Sea Breeze Field

Tokyo's first Ramsar Site!

Kasai Marine Park's tidal flats and area preserve an extensive tidal flat environment, and both human life and a rich natural world co-exist here. In October 2018, the park became the first site in Tokyo to be designated a wetland of international importance by the Ramsar Convention on Wetlands. The Ramsar Convention: the Convention on Wetlands of International Importance especially as Waterfowl Habitat

Kasai Marine Park fulfils 3 of the 9 international criteria:

- ✓ It regularly supports 20,000 or more waterbirds
- ✓ It regularly supports 1% of the individuals in a population of one species or subspecies of waterbird
- ✓ It supports plant and/or animal species at a critical stage in their life cycles

First site in Tokyo!
Designated Ramsar Site

A park of protected wetlands, surrounded by the sea, with an east beach and a west beach

Kasai Marine Park is made up of two artificial tidal flats and a marine area that includes natural shallows and tideland. It stretches 2 km offshore, and boasts an area of around 412 ha. The park was created by reclaiming land from the sea to preserve the disappearing tidal flats in Tokyo Bay, and opened in 1989. Visitors can enjoy a variety of recreational activities on the West beach, such as clam digging.
